

B&S

Load sensing hydraulic system reduces fuel usage by 25%

Hydraulic over load protection system with toggle plate protection to ensure a continuous process

High stroke of the jaw for excellent throughput

HB 450 steel hopper and wear plates

Hydraulic adjustable overband magnet

Steel hydraulic piping, longer lifetime, better performance and easier to repair

Superior level of surface treatment

User friendly RELYTEC control panel

Long pre screen, higher crushing capacities, better product shape and less wear
