Sandvik QE342 Scalping Screen

The new Sandvik QE342 is an evolution of the class leading Sandvik QE341 which comes with a host of updates and new features. The Sandvik QE342 is a heavy duty scalper with class leading open scalping area enabling it to deliver enormous rates of production.

Its design and attributes means that the production of even the most-hard wearing of materials is facilitated through a wear resistant steel apron feeder, with massive stockpiling capability and over-wide conveyors that maximize delivery.

Its new purpose designed crusher style chassis has been developed specifically to accommodate the new more powerful and efficient engine power packs. Enhancing its versatility, the Sandvik QE342 incorporates a wear resistant rigid hopper which is compatible for 2-way or 3-way split configurations, as well as having the ability to interchange side conveyors thereby demonstrating the ultimate flexibility of the unit. The screen-box jack up facility allows easier access to the bottom deck for maintenance and screen media changes.

Technical data

Screen box	4.7 x 1.45 m (16 x 5 ft)
Engine	C4.4 74.5 kW (100 hp)
Transport length	14.83 m (48 ft 8 in.)
Transport width	3.00 m (9 ft 10 in.)
