

Powered via a Caterpillar C9.3B Tier 4 Final / STAGE V 310Kw (420HP) engine

Twin Shaft design provides exceptional intake behaviour, less wear, self-cleaning and prevents material wrapping

Intelligent self-protecting control system

Latest EDGE Operating System (EOS) with On-board load sensing diagnostics

"VS Status Alert" a system of lightening signals provide a quick and simple communication link between the machine and the operator

Improved fuel efficiency combined with eco-power saving functionality

Complete radio remote control functionality allows for one-man operation

Hydraulic hopper extensions and automatic tipping hopper cycle
