MTS140 FEATURES & BENEFITS

EDGE Innovate's MTS140 is a mobile mounted 140ft (42.2m) long telescopic stockpiler. It offers operators the most cost effective bulk material handling solution on the market. The MTS140 allows operators to achieve maximum stockpile capacity using a robust, fully automated stockpiling solution that eliminates the doubling handling of material and maintains high quality material via the creation of windrow stockpiles.

Boasting an array of design features, the MTS-Series includes an automated stockpiling control system, variable discharge height and belt speed and the option of direct electric or diesel genset power sources.

Whether it is; sand and gravel pits operators, aggregate producers, inland or port terminals; the EDGE MTS-Series is the perfect stockpiling solution for a vast range of applications and material types.

KEY HIGHLIGHTS

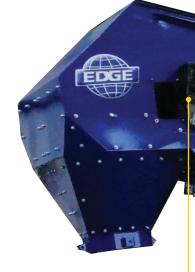

- Eliminates the double handling of material.
- Fully automated stockpiling programmes reducing labour requirements.
- Eliminates material segregation and ensures stockpile meets required specification.
- Fully extendable conveyor of up to 42.2m (140') long.
- Impressive stockpiling rates of up to 1000+ Tonnes per hour.

INCREASE STOCKPILE CAPACITY BY UP TO 30%

MTS140 DESIGN FEATURES

Hydraulic telescopic function enables the MTS140 conveyor length to be adjusted from 26.5m (86'11") to 42.2m (140')

Discharge height of up to 14.3m (46'10"). Conveyor head section incorporating height sensors for auto-raise/lower functionality.

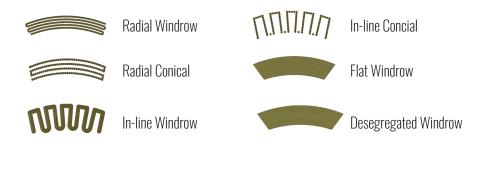

Optional walkway and ladder access is available to allow for quick and easy maintenance.

Enables for one man operation with all main functions controlled via wireless remote

Hydraulic working angle adjustment

AUTOMATIC STOCKPILE PROGRAMS

Optional feedboot extensions, wear liners, rockshelf and impact solutions available

Optional track boggle for self propellation and 360° slewing functionality

User friendly control panel allows operators to select from a range of stockpile programs

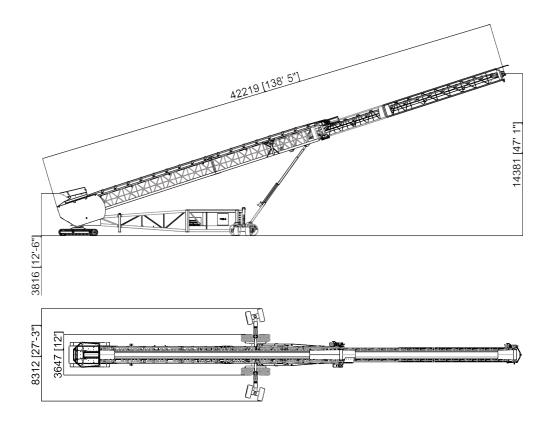

Optional diesel or diesel genset power source options available.

Independent hydraulic drop down axles allows for a quick transition between operational and travel mode.
