## EDGE TR516 Trommel

### TRM516 – TRT516 – TRS516

The new EDGE TR516 Trommel Range is a robust durable machine designed for the Recycling, Composting and C&D industries.

With numerous screens and drum types available the TR516 Series provides high flexibility and is the perfect option for end users who are constrained for space. The TR516 boasts design features such as a sixteen foot long drum, four wheel direct drive system, hydraulic variable speed control drum and feeder conveyor with load sensing controls. Oversize and radial fines conveyors are available for higher stockpiling require-

Innovatively designed for fuel efficiency and low operating costs

Easily transported from site to site

Capable of working in the most extreme conditions and environments

Radial fines conveyor for huge wind row stockpiling capacities

Optional tipping grid

Telescopic oversize conveyor for larger stockpiles

Fully road towable

Highly efficient maintenance friendly hydraulic drive system

Unique fuel and energy saving control system

Can be supplied without radial & oversize conveyors

Global After Sales Support
